8. (Currently Amended) A method of selling a vehicle that includes one of a plurality of available passive suspension options using an adjustable active suspension module, comprising the steps of:

- (A) informing a customer of the plurality of available passive suspension options;
- (B) adjusting the adjustable active suspension module to perform as a first one of the plurality of available passive suspension options;
- (C) permitting the customer to sample the first one of the plurality of available passive suspension options;
- (D) adjusting the adjustable active suspension module to perform as at least one other of the plurality of available passive suspension options; and
- (E) permitting the customer to sample the at least one other available passive suspension option.

9. (Currently Amended) The method of claim 8, including determining the customer's choice for ordering the a vehicle and specifying a chosen one of the available passive suspension options to be included with the vehicle.

10. (Currently Amended) The method of claim 8, wherein the adjustable active suspension module is supported on a demonstration vehicle and steps (B) through (E) are performed using the demonstration vehicle.
